-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1 and 7 are objected to because of the following informalities: Claims 1 and 7 recite "said first and second ends may be selectively extended". The term "may be" is overly broad since it does not clearly define the meets and bounds of the claims and the examiner cannot be certain if applicant intends to claim the limitations following the term "maybe". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,134,866 to Bethards.

Bethards '866 discloses a wheel lock device for selectively locking on a wheel rim, said device comprising: an elongated member (63) having a first end (figure 1; right end) and a second end (figure 1; left end), said elongated member having a first side (side facing 61) and a second side positioned opposite of each other; a first arm (60) being attached to said first side and extending away therefrom, said first arm being orientated generally perpendicular to said elongated member, said first arm being positioned adjacent to said first end, a foot (61) being attached to free end of said first arm, said foot extending in a same direction as said first end

Art Unit: 3676

(first end extends from right to left as does the foot 61); a sleeve (11) being positioned on said elongated member and being selectively movable between said first end and said second end, said sleeve having an upper wall, a bottom wall, an inner wall and an outer wall, said inner wall being positioned adjacent to said first side; an urging member (41) being mounted in said outer wall (figure 1; wall reference numeral 11 points to) for selectively biasing said outer wall away from said elongated member (when unlocked said outer wall will move along with the sleeve 11 in a direction away from the elongated member which is to the left in figure 1 since if allowed to keep extending outward in this direction the outer wall would be completely away from the elongated member), a second arm (50) being attached to an outer surface of said inner wall and extending in a same direction as said first arm, a foot (51) being attached to a free end of said second arm, said foot extending in a same direction as second end (second end extends from right to left as does the foot 51); and wherein said first and second legs may be selectively extended into openings in the wheel rim and said second leg moved away from said first leg such that said first and second legs engage the rim (figure 5).

Allowable Subject Matter

4. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claim 7 would be allowed if rewritten to overcome the claim objection stated above.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Openiano '185 discloses feet that extend in a same direction as a first and second end.
